

## DenyAll on all application security fronts

*DenyAll will attend key industry events and proposes a new series of Webinars, joint partner events and training sessions. These events will be the opportunity for the application security vendor to highlight key IT security challenges and its own latest innovations.*

### Shows and conferences

---

On March 20 & 21, DenyAll will be present at **Infosec Belgium**, in Brussels, and **Infosecurity Word Exhibition and Conference** (ISWec), in Kuala Lumpur, Malaysia. The company will attend the 5<sup>th</sup> edition of the **GSdays** in Paris on April 4 and the **Cercle de la Sécurité** events in Paris on March 26, May 16 and June 27. DenyAll will also exhibit at Communic Asia in Singapore on June 18-21.

### Webinars

---

DenyAll's upcoming Webinars cover the following key themes: BYOD, migration, virtual patching and the risks associated with new Web technologies.

- March 19: **Beyond BYOD**, featuring Promon's CTO and founder, Tom Lysemose. The webinar will focus on how to ensure that corporate data remains secure while being accessed by devices that don't comply with corporate policy. The innovative Client Shield solution for Web and mobile applications will be presented.
- March 26: **why and how to migrate to DenyAll Protect version 4.1?** This webinar will highlight the advantages of the new platform and present the methodology used by DenyAll to support customers through the migration process.
- April 9: the **new features in DenyAll Detect 5.0**, including in the critical areas of reporting and asset management.
- April 23: the **new features in DenyAll Protect 4.1 FP1**, with a focus on new security engines and the virtual patching capabilities derived from the integration between the Detect and Protect product lines.
- May 29: a new edition of the "**CTO Talk**" webinar series, during which DenyAll CTO Renaud Bidou will highlight the dangers associated with the broader use of **HTML5**.

### Joint events with partners

---

DenyAll bets on partners to present its innovative solutions to customers and prospects in all regions. The following joint events have been scheduled so far:

- April 16, in Lyon, with **Océalis Sécurité**: a technical workshop on Web attacks and mitigation.
- May 15, in Kuala Lumpur, with **Inter XS**: a seminar focused on securing Web applications.
- May 22, in Aix-en-Provence, with **IPenergy**: a luncheon on the virtual patching of application vulnerabilities.
- June 4 in Toulouse and June 6 in Bordeaux, with **So-IT**: a workshop on the complementarity of next generation firewalls and WAFs.

## Trainings

---

Here's the training calendar for the upcoming 4 months:

- March 18-19 and June 3-4: **DenyAll Protect version 4.1**. Includes a technical update on http security, overview of the different technology modules and hands-on configuration exercises.
- March 20 and June 5, advanced session on **DenyAll Protect 4.1**, looking at the configuration and modification of filtering modules, such as the black list, scoring list and white list.
- April 8 and June 10, **DenyAll Detect**.
- June 27-28, **Web attacks**, delivered by Renaud Bidou, DenyAll CTO.

In addition, DenyAll is setting up free partner training sessions in Germany on February 28 and March 1<sup>st</sup> and April 2-3, and in France on March 11-12 and May 13-14.

## Registration

---

Registration to all webinars and trainings can be performed on the company's website:  
[http://www.denyall.com/news/events\\_en](http://www.denyall.com/news/events_en)

### About DenyAll

DenyAll is an innovative leader in the application security market. The company was one of the pioneers of the Web Application Firewall market in Europe. Building on +10 years of experience securing and accelerating web applications and services, DenyAll innovates to respond to the needs of organizations of all sizes. Its products detect IT vulnerabilities and protect infrastructures against application-layer attacks. DenyAll builds an ecosystem of expert security partners, outsourcers and cloud providers, and works with other vendors to offer comprehensive solutions, dedicated to securing and accelerating applications.
