denyall -) SECURIT SOLUTIONS

Deny All will participate to the 4th edition of Infosecurity in Belgium
the 25th and 26th of march 2009

Bruxelles Expo - Booth A136

Deny All, French and European leader of solutions for protection, authentication and accelerating Web applications, XML and FTP, announces its participation in Infosecurity, event bringing together the best national and international experts in the IT sector, including those of security.

To better grasp the challenges of cyber crime and to share its expertise on these subjects, **Deny All present version 3.8 of rWeb**, whose main features lie in :

- Scoring List (graylist mecanism) to define and prioritize several criteria to capture the protection of applications in a comprehensive manner, including stopping a maximum of SQL and XSS injections.
- UBT : Behavioral monitoring of the Internet surfer allowing to protect from complex vulnerabilities and struggle against the theft of data by robots.
- PCI DSS : the Deny All customers can achieve through rWeb the eligibility criteria for the standard PCI DSS

On this occasion, you will meet and attend demonstrations by the presence of:

- **Christian d'Orival,** Chief Operating Officer
- **Spencer Hinzen,** Sales Manager for Benelux
- **Luis Delabarre**, Pre Sales Consultant

If you want to receive individual demonstration or for an interview
