

Deny All participate in the 3rd International Forum on Cybercriminality (FIC), the 24th of march 2009

Lille, Grand Palais – Stand 18

Deny All, French and European leader of solutions for protection, authentication and accelerating Web applications, XML and FTP, announces its participation in FIC 2009, event bringing together the best national and international experts in the IT sector, including those of security.

To better grasp the challenges of cyber crime and to share its expertise on these subjects, **Deny All present version 3.8 of rWeb**, whose main features lie in :

- Scoring List (graylist mechanism) to define and prioritize several criteria to capture the protection of applications in a comprehensive manner, including stopping a maximum of SQL and XSS injections.
- UBT : Behavioral monitoring of the Internet surfer allowing to protect from complex vulnerabilities and struggle against the theft of data by robots.
- PCI DSS : the Deny All customers can achieve through rWeb the eligibility criteria for the standard PCI DSS.

On this occasion, you will meet and attend demonstrations by the presence of **Stéphane BERENGER** (Sales Manager for North of France) and **Johanne ULLOA** (Pre Sales Consultant).

If you want to receive individual demonstration or for an interview
with Deny All, please contact :
