

EADS Cassidian selects Deny All to secure its SAP applications

Deny All, an application security market leader, is proud to announce that Cassidian, a division of EADS, is one of its new customers.

Cassidian, a division of EADS which develops security and defense systems, selected rWeb, Deny All's Next Generation Web Application Firewall. As part of a large pan-European project aiming at securing access to SAP applications, rWeb has been deployed in several countries, namely Germany, France and later in other countries. Deny All secured this project with the help and support of his partner, Secunet Security Networks.

“Several divisions of EADS have been using our products for years. We're very happy to work with Cassidian, a leading force in the fight against cybercrime in Europe. This project demonstrates that Deny All's security expertise is a key differentiating factor, which enables us to convince the most demanding large European accounts” says Jacques Sebag, CEO of Deny All.

About Deny All

Deny All is an innovative software leader in the growing application security market. The company was one of the pioneers in the Web Application Firewall market. Building on +10 years of experience securing and accelerating large customers' Web, XML and FTP application-layer flows, Deny All keeps innovating to respond to the needs of organizations of all sizes. Against modern threats, its products protect transactional Web sites, the Web front-ends of critical applications, Web Services-based custom applications, as well as social and collaborative tools, both in traditional and SaaS/cloud environments. The company builds an ecosystem of partners, distributors, integrators, outsourcers and hosters, and works with other vendors to offer comprehensive solutions, dedicated to securing and accelerating modern applications.
