

rWeb 3.8 evaluated by SIC Laboratory

SIC (Seguridad en Informática y Comunicaciones) is, since 1992, the information security and IT systems security widest read magazine in Spain. Directed to CISOs, CIOs and other information security manager profiles, this Ediciones CODA publication serves as a cohesion tool for its professional readers in Spanish. SIC Laboratory is the magazine section where security hardware/software products and tools are identified, examined, analyzed and evaluated.

In June, our leading product rWeb 3.8 has been evaluated and "the results of the test [for the White List] has led to very satisfactory values of around 98.2%. And the test results have been excellent with the Black List."
